

WE ARE NOT ALONE!

### INTRODUCTION & AIMS

Since 2019, "Celebrating Life" has been facing and overcoming challenges to reach the highest health authorities in Bolivia and it is since that year that, in very specific situations, we have obtained meetings, presented proposals and established a presence, reaching today today to be the visible face of leukemia at the national.

Given the constant obstacles and requirements demanded by the authorities with respect to medicines, supplies and equipment that arrive in the country as a donation, as well as the non-compliance with the regulations of the Cancer Law enacted in 2019, we are working as patient organization to make our needs visible and achieve, little by little, the humanization of processes.

### RESULTS

The road has not been easy, we continue to face challenges but we have already managed to participate in government processes, being aware that we still have a long way to go, but we continue working and meeting our objectives, for the good of all patients everywhere. Bolivia, for those who went ahead of us on the path, for those who are here and for those who will come.

### METHODOLOGY

Open, cordial and humanizing communication strategies have been used with government authorities, making our need known through letters, face-to-face meetings, calls and constant monitoring on our part.

Our main objective being to ensure that the benefits continue to reach our country, avoiding hindering the normal processes that are not in our own hands, but with the firm conviction that there is no task impossible to do when our lives and society depend on it. of all the beneficiaries.

### CONCLUSIONS

The process of humanization of government laws and regulations is difficult for citizens to access and even more so when it comes to health, but as a patient association, we are directly called to make our needs visible and although it is not easy, there is no worse struggle. than what is not done and faced with humility, sincerity and above all recognition of needs, presenting not only requirements, but also proposing solutions.
